

Zimbabwe Fiber Optic Communication Prism

Overview

The agreement, signed Tuesday, June 17, aims to develop a resilient, high-capacity national backbone network to strengthen the country's digital transformation. GOVERNMENT has, in the past seven years, built an additional 10 152km of long-haul fibre optic backbone across the country, to improve service delivery in critical areas of health, education and agriculture, buttressing the Second Republic's commitment to ensuring that Zimbabwe has superior. Zimbabwe is advancing its fiber optic infrastructure through a new partnership between PowerTel Communications—a subsidiary of the national electricity company—and Paratus Zimbabwe. PowerTel is the wholly owned subsidiary of Zimbabwe Electricity Supply Authority (ZESA) and is licensed to operate an optic fiber. In a significant step towards technological advancement, President Emmerson Mnangagwa has officially commissioned an ambitious \$18 million fiber optic project, setting a precedent for innovation and self-sufficiency in Zimbabwe.
